

(1) $(W D)_{F_o} = 100 \times 10 \times \cos 0^\circ = +1000$

(2) $(W D)_f = -40 \times 10 = -400$

(3) $(W D)_g = 0, (W D)_N = 0$

$(W D)_{\text{by all the force}} = W_{F_o} + W_f + W_g + W_N$
 $= +1000 - 400 + 0 + 0 = 600$
